

769 foreigners register on MoT's 'Stranded in India' portal

The Ministry of Tourism (MoT) launched portal strandedinindia.com on March 31, 2020, with a view to identify, assist and facilitate foreign tourists who are stranded in various parts of India due to the lockdown situation necessitated by the COVID-19 global pandemic.

Such tourists would need to log on to the portal, provide some basic contact information and narrate the nature of issues being faced by them, if any. In the first 5 days of its operation, 769 foreign tourists from all over the country registered on the portal.
