

Marriott India plants 125,000 trees across hotel portfolio on World Environment Day

Marriott India Plants 125,000 Trees, Achieves World Environment Day 2026 Sustainability Goal

Demonstrating its commitment to environmental stewardship, Marriott India has successfully achieved its World Environment Day 2026 target of planting 125,000 trees across its portfolio of over 200 hotels nationwide. Building on last year's milestone of 100,000 trees, the initiative was driven by the company's enhanced "Four Trees Per Room" commitment and witnessed the participation of more than 7,700 associates, who collectively contributed over 21,000 volunteer hours. Conducted in collaboration with local authorities, NGOs, and community groups, the plantation drives focused on restoring green cover, enhancing biodiversity, and strengthening climate resilience. The achievement reflects Marriott India's ongoing efforts to create a lasting environmental impact while fostering sustainable community engagement across the country.
